[Crazy: A Music Player for the Unborn](#)

RiMo™

Advanced sound system
for you and your baby

You know what they say: It's never too early to bias your children's musical tastes.

The [Ritmo Advanced Sound System](#) is a prenatal music player. It allows you and your baby to share the same music.

What's next? A video player that projects movies onto the skin of the mother's belly?

Update: My wife says these types of things have been around for a long time. Just shows what I know.

For what it's worth, I had no idea they existed either. The baby is only in there for 9 months, I couldn't imagine paying out the cash for something like that.

- [RedHotFranchises](#) on [January 18th, 2010 2:32 am](#)

There are more advanced sound systems than this wherever we go making it loud enough for the unborn to hear them, so this is definitely a crazy invention.

If their motive is to bias the children's musical taste then they're out of luck.

Likes and Dislikes are all Genetic and Biological.
